

Pest Control

All our properties are professionally treated by a pest control company on a regular basis. However, sometimes bugs sneak in especially during the summer hot months.

To avoid seeing any pests, we advice guests especially during summer not to leave any food items including fruits, or food traces on surfaces as these can attract pests. Please try to keep all food in the fridge and clean up any food traces.

We also advice guests to keep the bathroom, wash basin, kitchen sink drains closed during the summer and open them only when used and close them again after.
